

Laptop Specifications Applied Data Science & Artificial Intelligence 2024-2025

For first year students any decent laptop will work. We strongly recommend having a **WINDOWS device**, since all software we run will work smoothly on such a device, Macbooks need workarounds.

From the second year on we recommend a more sophisticated device with a dedicated GPU.

We recommend a laptop with the specifications below:

- Processor: AMD Ryzen 7+ or Intel i7, Octa-Core 3.2GHz/4.4GHz 16MB
- RAM: *min.* 16 GB
- SSD: 1TB
- GPU: *min* NVIDIA GeForce RTX 3060 *or above*
- OS: Windows 10 or Windows 11
